Traffic

The type of traffic will help identify the right material for matching the usage

- Ultra-hard
- Durable surface
- Flexible finish
- Easy to clean and repair coating

Offered by **Coatect®500** to withstand continuous vehicle traffic.

Purpose

The intended use of the area is an important consideration when selecting industrial resin flooring.

Coatect®500 is the versatile solution:

- Chemical resistant
- Hygienic
- Closed-pore properties
- Extremely easy to clean
- Easy to apply

Environment

Environmental conditions can affect industrial resin floors differently.

Coatect®500 flooring is extremely durable and scratch-resistant, as well as the easiest type of resin floor to repair, which makes it an ideal choice for locations exposed to a wide range of traffic and weather conditions

Finish & Colour

Flooring systems offer a range of finishes and colours to suit each client's requirement.

Coatect®500 offers a wide range of finishes with multiple properties :

- Anti-skid
- Chemical resistant
- Moisture resistant
- Flexible
- Highly customisable colour
